

CHINA INDUSTRIAL WASTEWATER FORUM

China Industrial Wastewater Forum 2009 will be held in cooperation with Liaoning Provincial Government in Shenyang. Delegates will have ample opportunities to exchange valuable knowledge and experiences in the latest industrial water and wastewater technology and infrastructure advances.

A wide range of topics will be covered:

Theme A: Industry Water Conservation and Emission Reduction

- A1: Status and Prospects for China's Industry Water Conservation and Emission Reduction
- A2: Challenges in China's Industrial Wastewater Treatment
- A3: Bayer Technology Services – sponsored presentation
- A4: Overseas Practices in Industrial Wastewater Operations

Theme B: Refinery and Petrochemical Industry Wastewater Treatment, Recycling and Re-use

- B1: Status and Prospects of China's Industrial Water Saving and Emission Reduction Plan
- B2: Recirculation of Cooling Water in the Petrochemical Industry
- B3: Innovations in Wastewater Treatment and Re-use in Petrochemical and Petroleum Refineries
- B4: Recycling Wastewater from Oil Refineries
- B5: Technology Research and Practices of PTA Wastewater Depth Treatment and Re-use

Theme C: Wastewater Depth Treatment and Recycling Methods for the Steel and Metallurgy Industries

- C1: Gas Blast Furnace Wastewater Treatment
- C2: Zero Emission of Pyrogenic Phenol and Cyanogen Wastewater
- C3: New Technology for Steel Cold Rolling Emulsified Mixture Wastewater Treatment
- C4: Biological Treatment Technology for Coking Plant Wastewater
- C5: Acidity Wastewater Treatment in Non-Ferrous Metal Mines
- C6: Pyritic Wastewater Treatment in North-East China

Theme D: Industrial and Comprehensive Industry Park Wastewater Management

- D1: Wastewater Treatment Technologies for Chemical Industry Parks
- D2: Modeling of Centralized or De-centralized Electroplating Wastewater Treatment
- D3: Case Study: Qipanjing Industry Park, Ordos
- D4: Case Study: Pingluo Industry Park, Ningxia
- D5: Case Study: Fushun Specialty Chemical Industry Park

INDUSTRY FOCUS WORKSHOPS

Industry players are keen to be introduced to the latest technologies, products and services. Solution providers are looking for opportunities to network with senior leaders in China's heavy industry: oil refinery, coal chemical, thermal power generation and nuclear generation.

The Industry Workshops deliver the unique channel: a focused roundtable where solution provider and project owners go in-depth on technology and process, all this in an open atmosphere where still plenty of valuable time is given to networking and business.

The 2009 Industry Workshops will again offer this professional setting for solution provider and project owner, this time with enlarged categories of highly polluting companies besides a larger selection of industries. The launch of a new technology for the first time in Asia or the world, a benchmark study between different solutions pointing out that yours is the most efficient, research with high-level decision makers and problem owners, all exclusively yours... the workshops offer the channel.

Who Will Be the Project Owners?

Presidents, CEOs, General Managers, COOs, Chief Engineers, Strategic Planning Directors, Business Directors and Procurement Directors from following state-owned industries, in and throughout China:
